## Customary Units of Length

Common Measurement and Data-4.MD.A. 1
Also 4.MD.A. 2
MATHEMATICAL PRACTICES
MP1, MP2, MP5

## Unlock the Problem

You can use a ruler to measure length. A ruler that is 1 foot long shows 12 inches in 1 foot. A ruler that is 3 feet long is called a yardstick. There are 3 feet in 1 yard.

How does the size of a foot compare to the size of an inch?

## (1) Activity

Materials $\quad$ 1-inch grid paper $■$ scissors $■$ tape
STEP 1 Cut out the paper inch tiles. Label each tile 1 inch.

STEP 2 Place 12 tiles end-to-end to build 1 foot. Tape the tiles together.

STEP 3 Compare the size of 1 foot to the size of 1 inch.

Think: You need 12 inches to make 1 foot.

1 inch
So, 1 foot is $\qquad$ times as long as 1 inch.

Use Reasoning Explain how you know the number of inches you need to make a yard.

## I. Example compare measures.

Emma has 4 feet of thread. She needs 50 inches of thread to make some bracelets. How can she determine if she has enough thread to make the bracelets?

Since 1 foot is 12 times as long as 1 inch, you can write feet as inches by multiplying the number of feet by 12 .

STEP 1 Make a table that relates feet and inches.

| Feet | Inches |
| :---: | :---: |
| 1 | 12 |
| 2 |  |
| 3 |  |
| 4 |  |
| 5 |  |

Think:
1 foot $\times 12=12$ inches
2 feet $\times 12=$ $\qquad$
3 feet $\times$ $\qquad$ $=$ $\qquad$
4 feet $\times$ $\qquad$ $=$ $\qquad$
5 feet $\times$ $\qquad$ $=$ $\qquad$

STEP 2 Compare 4 feet and 50 inches.

$\qquad$

Emma has 4 feet of thread. She needs 50 inches of thread.
4 feet is $\qquad$ than 50 inches.

So, Emma $\qquad$ enough thread to make the bracelets.

## MATH <br> BOARD

1. Compare the size of a yard to the size of a foot.

Use a model to help.

Customary Units of Length
1 foot ( ft ) $=12$ inches (in.)
1 yard $(y d)=3$ feet
1 yard $(y d)=36$ inches

1 yard is $\qquad$ times as long as $\qquad$ foot.

## Complete.

2. 2 feet $=$ $\qquad$ inches
3. 3 yards $=$ $\qquad$ feet
4. 7 yards $=$ $\qquad$ feet

## On Your Own

## MATHEMATICAL PRACTICES (4)

Interpret a Result If you measured the length of your classroom in yards and then in feet, which unit would have a greater number of units? Explain.

## Complete.

5. 4 yards $=$ $\qquad$ feet
6. 10 yards $=$ $\qquad$ feet
7. 7 feet $=$ $\qquad$ inches

ATHEMATICA
PRACTICE
4
Use Symbols Algebra Compare using $<,>$, or $=$.
8. 1 foot $\square$ 13 inches
9. 2 yards $\square$ 6 feet
10. 6 feet 60 inches

## Problem Solving • Applications

11. THINK SMARITR Joanna has 3 yards of fabric. She needs 100 inches of fabric to make curtains. Does she have enough fabric to make curtains? Explain. Make a table to help.
$\qquad$
$\qquad$

| Yards | Inches |
| :---: | :---: |
| 1 |  |
| 2 |  |
| 3 |  |

12. THINK SMARIER Select the measures that are equal. Mark all that apply.
(A) 4 feet
(C) 36 feet
(E) 15 feet
(B) 12 yards
(D) 480 inches
(F) 432 inches
13. GODEEPER Jasmine and Luke used fraction strips to compare the size of a foot to the size of an inch using fractions. They drew models to show their answers. Whose answer makes sense? Whose answer is nonsense? Explain your reasoning.

Jasmine's Work

1 inch is $\frac{1}{12}$ of a foot.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
$\qquad$
a.

MATHENATICAL (3) Apply For the answer that is nonsense, write an answer
PRACICE that makes sense.
$\qquad$
$\qquad$
b. Look back at Luke's model. Which two units could you compare using his model? Explain.
$\qquad$
$\qquad$
$\qquad$

## Customary Units of Length

## Complete.

Solve problems involving measurement and conversion of measurements from a larger unit to a smaller unit.

1. 3 feet $=$ $\qquad$ 36 inches

Think: 1 foot $=12$ inches, so 3 feet $=3=12$ inches, or 36 inches
2. 2 yards $=$ $\qquad$ feet
3. 8 feet $=$ $\qquad$ inches
4. 7 yards $=$ $\qquad$ feet
5. 4 feet $=$ $\qquad$ inches
6. 15 yards $=$ $\qquad$ feet
7. 10 feet $=$ $\qquad$ inches

Compare using $<,>$, or $=$.
8. 3 yards $\bigcirc 10$ feet
9. 5 feet
 60 inches
10. 8 yards

## Problem Solving

11. Carla has two lengths of ribbon. One ribbon is 2 feet long. The other ribbon is 30 inches long. Which length of ribbon is longer? Explain.
$\qquad$
$\qquad$
$\qquad$
$\qquad$
12. WRITE Math Write a problem that can be solved by comparing feet and inches using a model. Include a solution. Explain why you are changing from a larger unit to a smaller unit.

## Lesson Check (4.md.a.1)

1. Marta has 14 feet of wire to use to make necklaces. She needs to know the length in inches so she can determine how many necklaces to make. How many inches of wire does Marta have?

## Spiral ReView (4.NF.C.6, 4.MD.A.1, 4.MD.A.2, 4.MD.C.5a)

3. Describe the turn shown below. (Be sure to include both the size and direction of the turn in your answer.)

4. What decimal represents the shaded part of the model below?

5. Three sisters shared $\$ 3.60$ equally. How much did each sister get?
